Science

Scientific Theories

Section 1: Review

Chapter 1: Electric and Magnetic Interactions

- Objects, Properties and Materials (8)
- Systems and Subsystems (5)
- Interactions (8)
- Energy Transfer (9)
- Variables and Controlled Experiments (5)

Chapter 2: Swinging Systems

- The Pendulum and Periodic Motion (9)
- Measuring Frequencies (14)
- Pendulum Energy (12)

Chapter 3: Electric Circuits

- Bulbs & Electric Circuits (15)
- Switches & Shorting (8)

Section 2: Scientific Theories

Chapter 4: Circuit Testers

- Circuit testers (3)
- Electrical Conductors and Insulators (10)

Chapter 5: Electrical Circuit Puzzles

- Using Electrical Circuit Puzzles (4)
- Inferences (4)

Chapter 6: "Inventing" Scientific Theories (6)

Chapter 7: Investigating Colored Light (6)

Section 3: A Color Theory

Chapter 8: "Inventing" a Theory of Colored Light

- Color of Light (3)
- Prisms (5)
- Theory of Colored Light (5)
- Color Subtraction and Addition (7)

Section 4: A Magnetic Field Theory

Chapter 9: Discoveries with Colored Light.

Chapter 10: Exploring Magnetic Interactions

- Interactions With Magnets (6)
- Temporary and Permanent Magnets (6)

Chapter 11: "Inventing" the Magnetic Field (5)

Chapter 12: Investigating Magnetic Fields

- Detecting Magnetic Field Directions (6)
- Iron Filings and Magnetic Fields (8)
- Magnetic Poles (3)
- The Earth as a Magnet (9)

Chapter 13: The Magnetic Field of a Circuit

- Magnetic Fields of Wire Coils in Circuits (4)
- Electromagnets (11)
- Experiments with Electromagnets (6)

Section 5: An Electricity Theory

Chapter 14: Investigating Circuits. (10)
